HIGH HOT STAMPING MACHINES

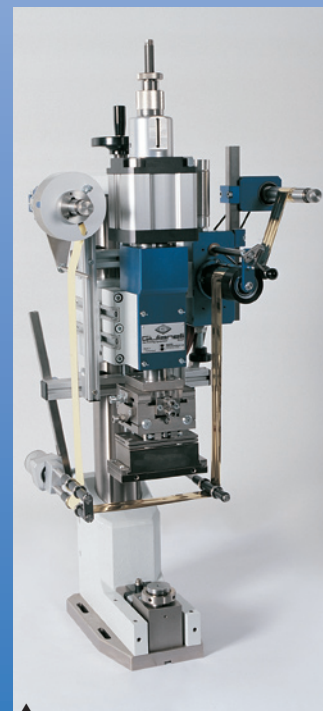

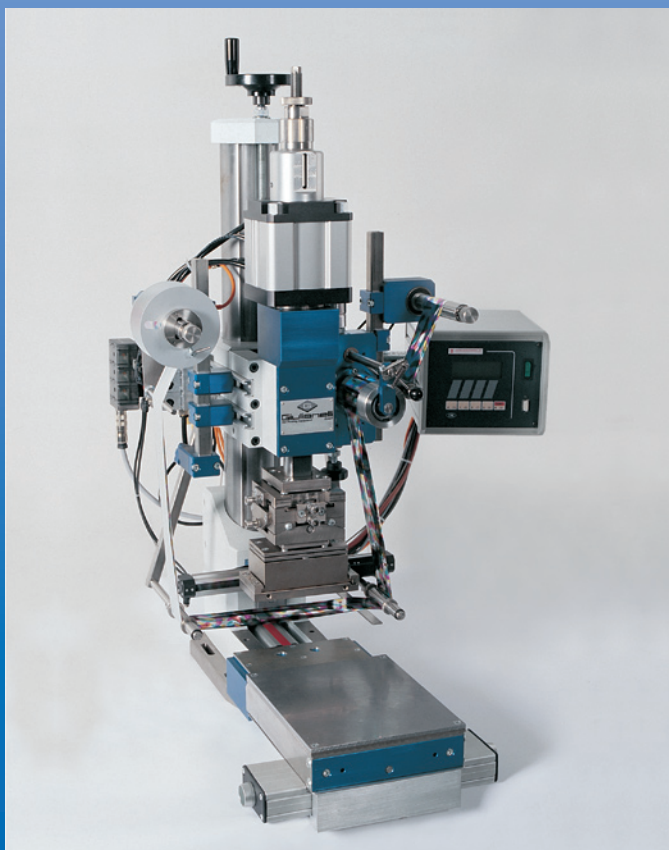

Giulianelli hot stamping machines are designed, manufactured and programmed in our own workshops. Therefore we provide high flexibility and close contacts between customer and production. The new generation of Giulianelli hot stamping equipments for product decorating with any type of hot stamping foil or heat transfers represents the result of many years of experience.

In Line hot stamping equipment with 4 to 8 hot stamping units for the decoration of cosmetic products

Hot Stamping Machine Type PE 10

The new concept of this multi purpose machine is mainly recommended for decorating small to medium sized series.

Hot Stamping Units

Units in various versions maybe incorporated in assembling- or production machines with rotary tables. Stamping pressure 5 kN, 10 kN or 25 kN.

Fully Automatic Machine for Pharmaceutical Industry

Custom made equipment, based on our type PE-ZR for hot stamping the scale onto the adjusting knobs of insulin control instruments.

Hot Stamping Machine Type PE 100

Powerful high precision machine, may be supplied with 50 kN or 100 kN stamping pressure.

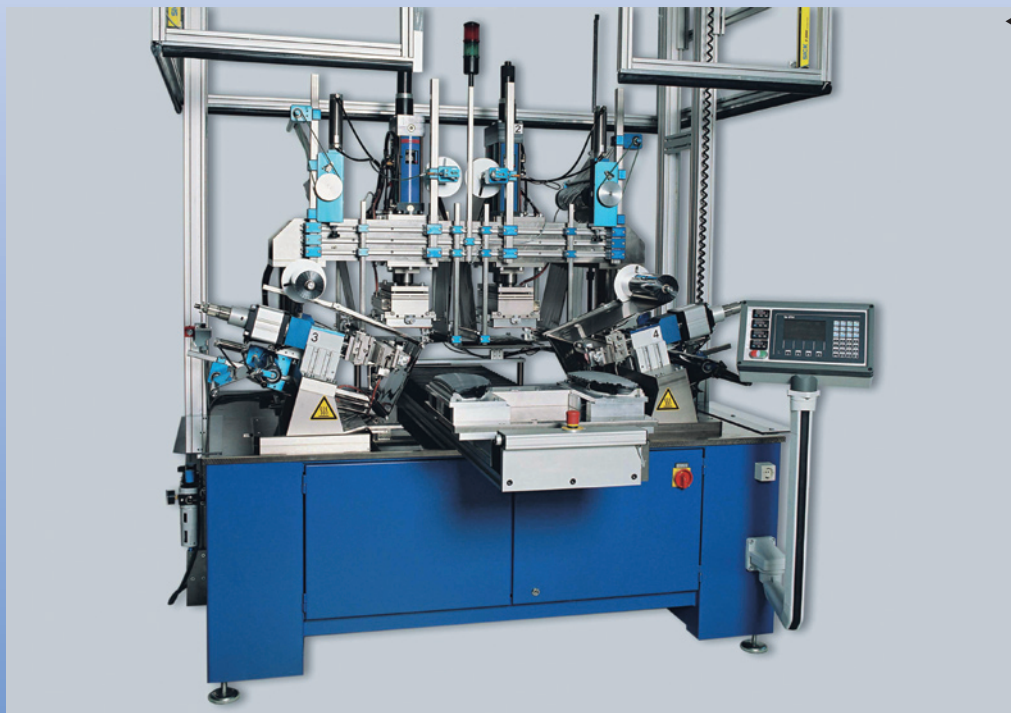

Fully Automatic Equipment for Counter Wheels Type ZR

Featuring high speed feeding, positioning, hot stamping and ejecting, custom made for any kind of counter wheels for speedometers, water meters etc.

Fully Automatic Production Machine

Installation for feeding and printing of several parts using sliding tables, rotary tables, hopper feeders, handling units, centering- and feeding stations, palletizing systems etc.

Machine for Automotive Industry

Semi automatic machine supplied for decorating front radiator covers for cars, combined with two vertical with 50 kN stamping pressure and two horizontal hot stamping units with 10 kN stamping pressure.

Fully Automatic Machine with 4 Stations

Special equipment, supplied for stamping houses of portable drilling machines, combined with the injection-molding machine.
